

SECURITY AWARENESS TRAINING

The training is focussed on those with little or no cyber security or technical knowledge and is delivered in small, succinct modules using real-world examples.

CORPORATE INTERNET DISCOVERY

This service may be used to learn what is being said on the internet about an organisation, what information employees are releasing or if there are any damaging news stories, social media posts or associations.

INDIVIDUAL INTERNET DISCOVERY

The information gathered in this type of discovery might be used to support pre-employment checks, to manage potential threats to a Director of an organisation or their families, or to understand more about a specific person of interest.

REMOTE VULNERABILITY ASSESSMENT

Remote vulnerability assessments are focussed on identifying weaknesses in the way your organisation connects to the internet. Service reporting will provide a plain-language interpretation of the results and how any vulnerabilities might be used by an attacker, as well as simple instructions on how any vulnerabilities might be fixed.

FIRST STEP WEB ASSESSMENT

This service provides you with an initial assessment of your website to highlight its most pressing vulnerabilities, focussing on the reconnaissance stage for the site. FSWA is considered an initial light touch assessment of the website compared to the complete Web App Testing service offered.

INTERNAL VULNERABILITY ASSESSMENT

The service will scan and review your internal networks and systems looking for weaknesses such as poorly-maintained or designed systems, insecure Wi-Fi networks, insecure access controls, or opportunities to access and steal sensitive data.

WEB APP VULNERABILITY ASSESSMENT

This service assesses your website and web services for weaknesses. The service reporting will describe in plain-language, what each weakness means to your business and the risks associated with each. Service reporting will include plans and guidance on how to fix those weaknesses.

SECURITY POLICY REVIEW

This service offers a review of your current security policy, how it is written and how it is implemented.

CYBER BUSINESS CONTINUITY REVIEW

This service reviews your business continuity planning and your organisation's resilience to cyber-attacks such as ransomware.
